

Voicecade Gameplay Instructions

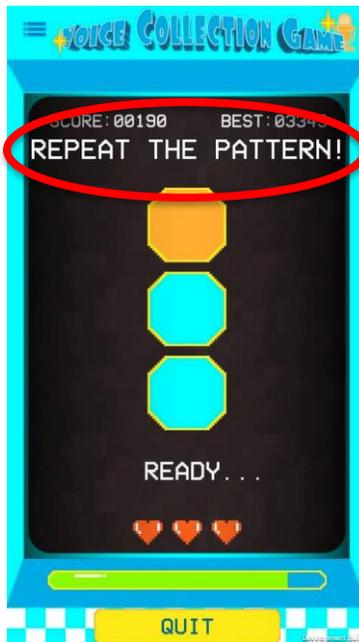

To begin playing the Voicecade app:

Click here to play games and record words

Click here to just record words and skip games

The Voicecade app includes a series of 8 mini-games, two of which are shown below. The short sentences (circled in red below) are instructions for that game.

After three mini-games, a picture and word will appear in a yellow box in the middle of the screen, and the word will be played out loud. (In the Voice Only mode, every screen will look like this.)

To hear the word again, your child should tap the picture. To record themselves saying the word, your child should tap the microphone icon. Once the microphone icon tapped, it will turn blue, which means that it is recording.

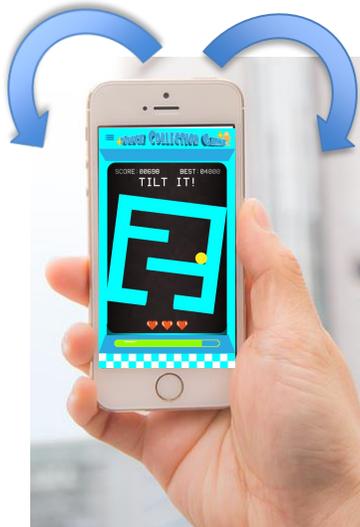

Instructions for Individual Mini-Games

Fight the evil bears by tapping them as they pop up from behind the rocks. But be careful – sometimes good guys pop up behind the rocks. You don't want to tap them!

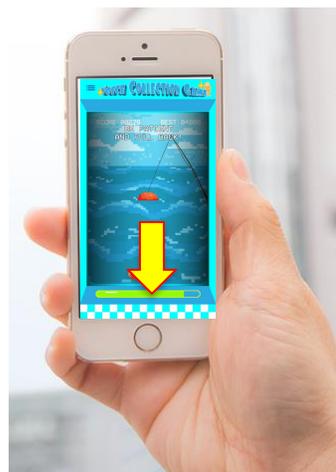

Tilt your device to roll the ball down to the bottom of the maze.

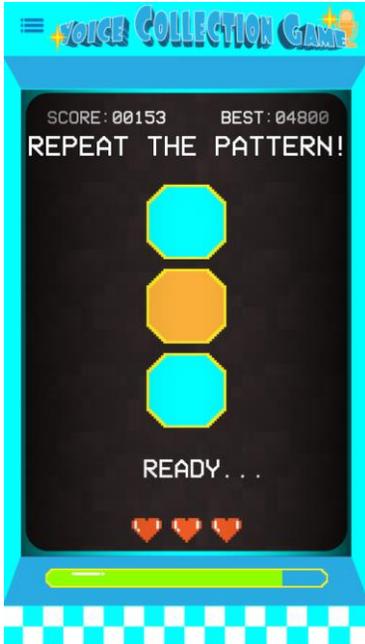

When the red bobber sinks, pull your device toward you, like you're reeling in a fishing pole.

If you are using a tablet, swipe down on the screen.

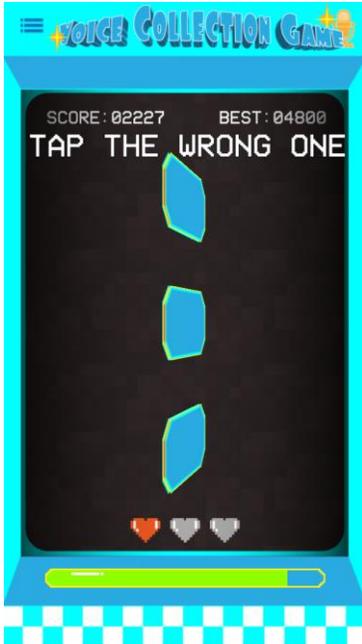

Pay attention to the order of the shapes as they turn orange. When the pattern is done, tap them in that order.

This is like the Simon game.

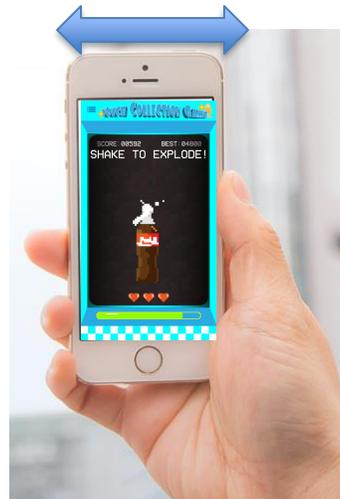

This is an easy version of Tic-Tac-Toe. Tap the empty shape to complete a row.

One shape will not match the others. Remember which one is different. When they turn around, tap the different one.

Shake your phone to explode the soda can.

If you are using a tablet, swipe your finger back and forth really fast.
